

Report of Shire Horse event, Beaulieu Heath Car Park, September 2021

Recently, a large group of horse owners were approved to hold a meeting at the Beaulieu Airfield site [19]. This involved numerous large vehicles, many horses, traps (carriages towed by horses, and people (approximately 50 owners with a similar number of specatators). The event consisted of running horses around the entire perimeter track for a whole day - an activity far in excess of any event ever held in the past by model flyers, and more intrusive than any impact the model flyers have ever had..

If organised horse events of this nature, which affect large areas of the heath, are allowed why are model flying events, of a smaller size, not allowed ?
